

SUSTAINING COMFORT MADE SUSTAINABLY

Stable, extra firm support.

Suprelle® Sustain has extra firm support in pillows and has superior insulation in comforters. This fiber has top loft and it is produced with Technology That Cares.

Suprelle® Sustain is a supportive fluff made with less land, less water and less CO₂.

Environmental respect.

Uniform warmth.

Firm support.

Machine washable.

SUPRELLE®
SUSTAIN

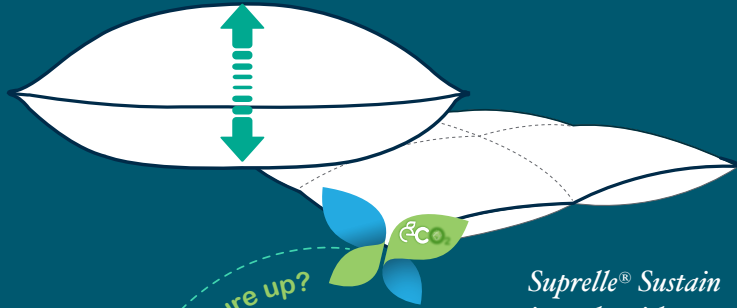

TECHNOLOGY
THAT CARES

Suprelle® Sustain is manufactured with our innovative Eco2 Technology, reducing CO₂ emissions, land and water use in the manufacturing process of the fibers.

LONG LASTING

Eco friendly support.

Suprelle® Sustain is a six denier fiber with a 4 hole structure that provides long lasting stability and support in pillows. This unique structure also contributes to it's excellent insulation properties in comforters.

is made with
Technology That Cares.*

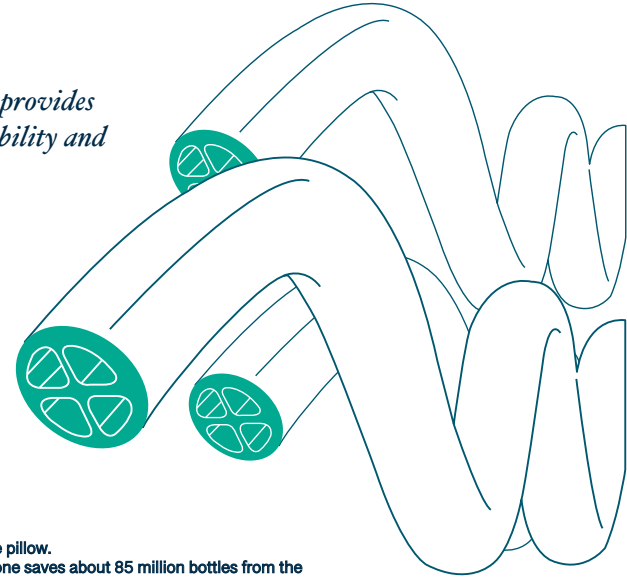

How do we measure up?

ADVANSA's current annual Technology That Cares fiberfill production saves the equivalent of over 2,000 trips by flight around the world in CO₂ compared to standard virgin fiberfill production.

This proprietary cross section allows for maximum support while also being produced sustainably. Technology that Cares is our mission to consciously innovate superior and sustainable fiber fill solutions, combining the best in comfort and conservation. Our next generation fluff is pure and premium fiberfill made with polymer derived from recycled bottles and produced with less land, less water and less CO₂.

*Unique 4-hole structure provides
better fiber structure stability and
insulation.*

Technology That Cares.*

We can turn 22 bottles into a 22 ounce pillow. In a single year, one pillow program alone saves about 85 million bottles from the landfill and converts them into Suprelle® fiberfill. We monitor and trace the origin of the bottles in each fiber bale. So we can verify that we've collected our bottles with the highest ethical standards, including no child labor.
